Hemodia

Carbon Emissions Data

The total emissions presented in the table below are derived from a carbon footprint assessment. They include all measured emission sources.

	Benchmark Year **Jan 2023 - Dec 2023**	**Current Year** **Jan 2025 - Dec 2025**
Scope 1 emissions (tCO2e)	194	129
Scope 2 emissions (tCO2e)	92	73
Scope 1 and 2 emissions (tCO2e)	286	202
Scope 3 emissions (tCO2e)	14 525,5	20 638
Total Annual Net Emissions (tCO_2e)	**14 811,5**	**20 840**

Where we can act directly, we have managed to reduce our emissions despite the growth in our business. Scope 3 emissions, which are linked to our value chain and particularly to our purchases, tend to rise in line with our revenue.
